***Did you know that***  
*Sewing machine needles reach temperatures of more than 250°Celsius?*

Sewing damages can occur also through to high heating of the sewing needle.

The speed of the stitch contributes it essentially. With average hard work and stitch speed of appr. 4'000 stitches per minute the common sewing machine needle can reach a temperature of more than 250°Celsius.

## **Topstitch or Cordonnet?**

As you like! It concerns always the same needle type 130/705 H-N.

The needle is available in the following execution:

Size: 80 – 110  
Box: 5 needles (blistered)

This needle suits perfectly for quilting works with thick threads.

### **Thread lore:**

Topstitch or Cordonnet is the perfect thread for button holes, sewing buttons as well as sewing curtains. Or simply: for everything that requires strong seams. Because this thread is extremely tear-resistant and has an ideal extension.
